Echinocactus [Notoc.] submammulosus (Nr. 1018)

Echinocactus microspermus (Nr. 905)
(Aus „Der Kakteen-Freund")

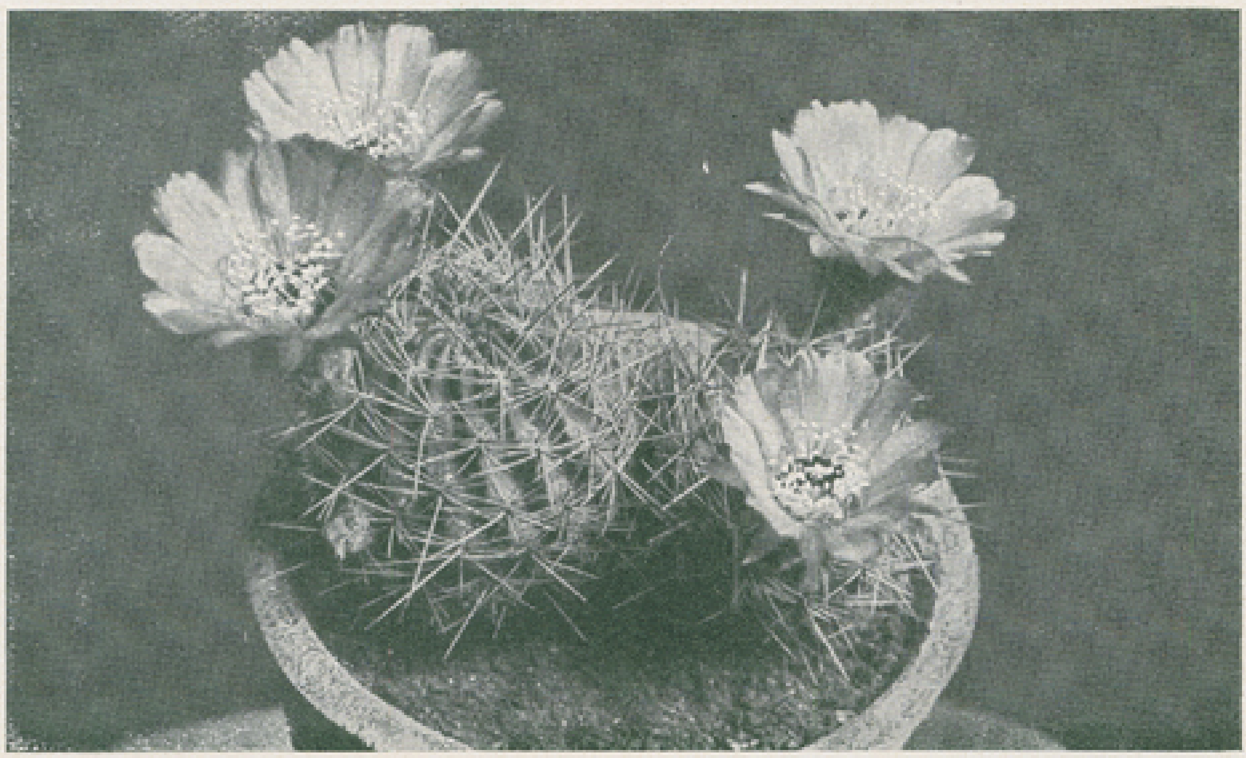

Lobivia species? [*Haageana?*] (*Nr. 1283*)

Echinopsis aurea (*Nr. 1202*)

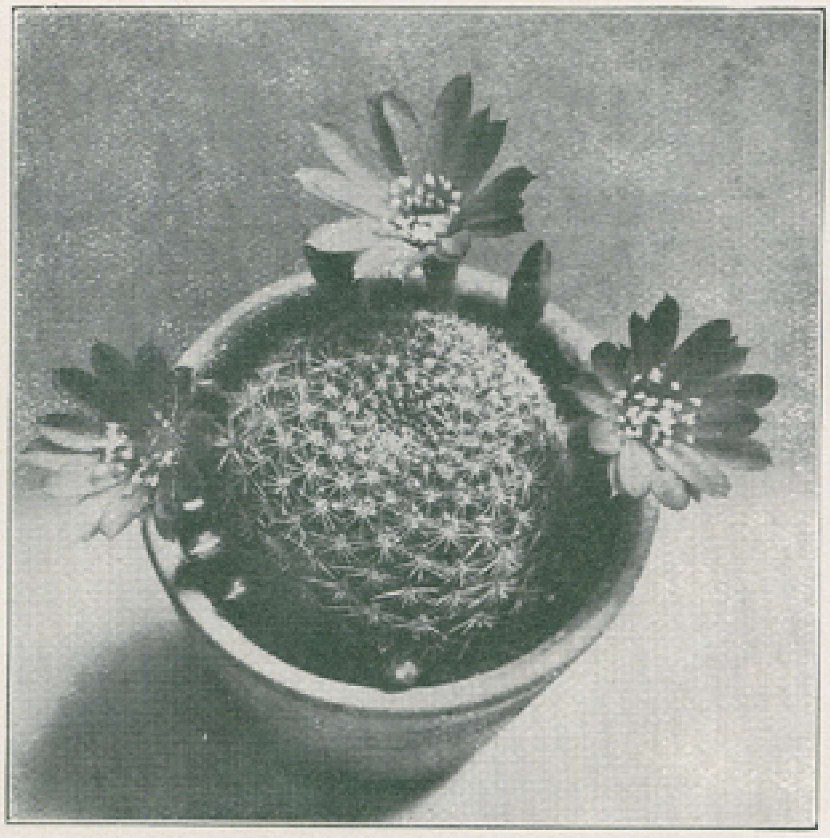

Echinopsis Bridgesii [*Salmiana*] (*Nr. 1206*)

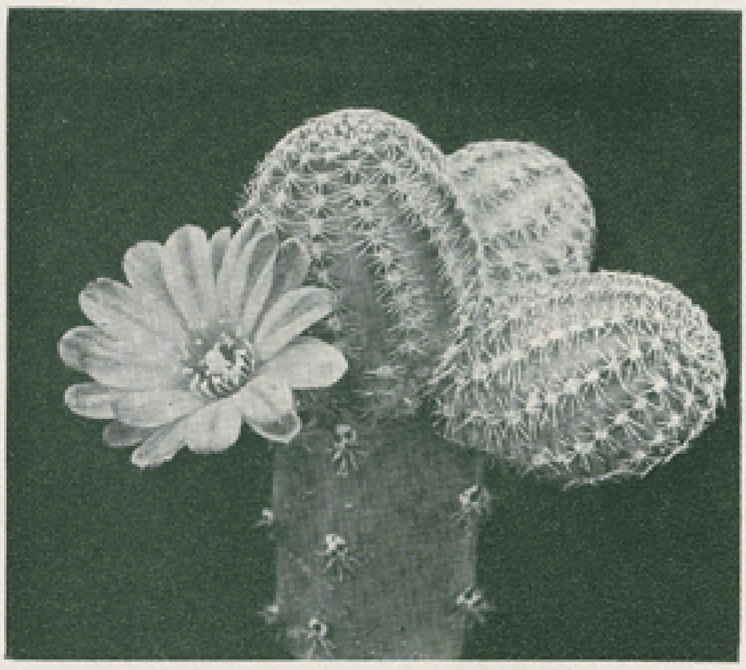

Lobivia spec. [Haageana?] (Nr. 1284)

Marsoneri

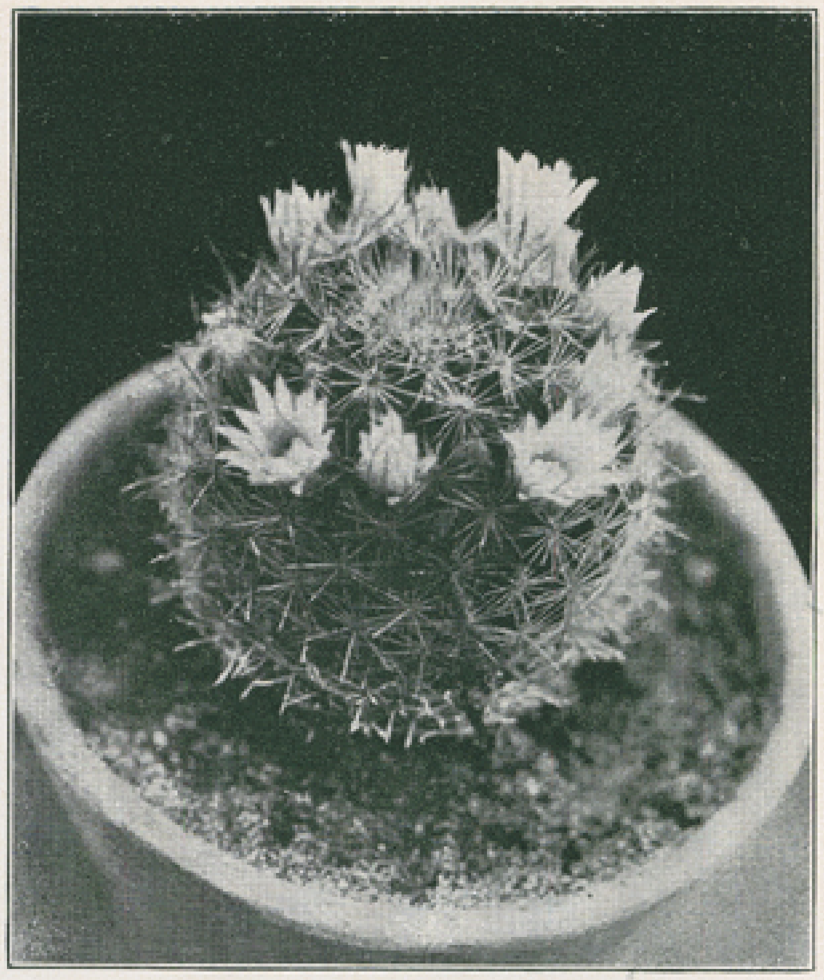

Rebutia minuscula [Echinocactus] (Nr. 912)

Rebutia Steinmannii Haagei
auf Harrisia Jusbertii gepfropft; grafted; greffé

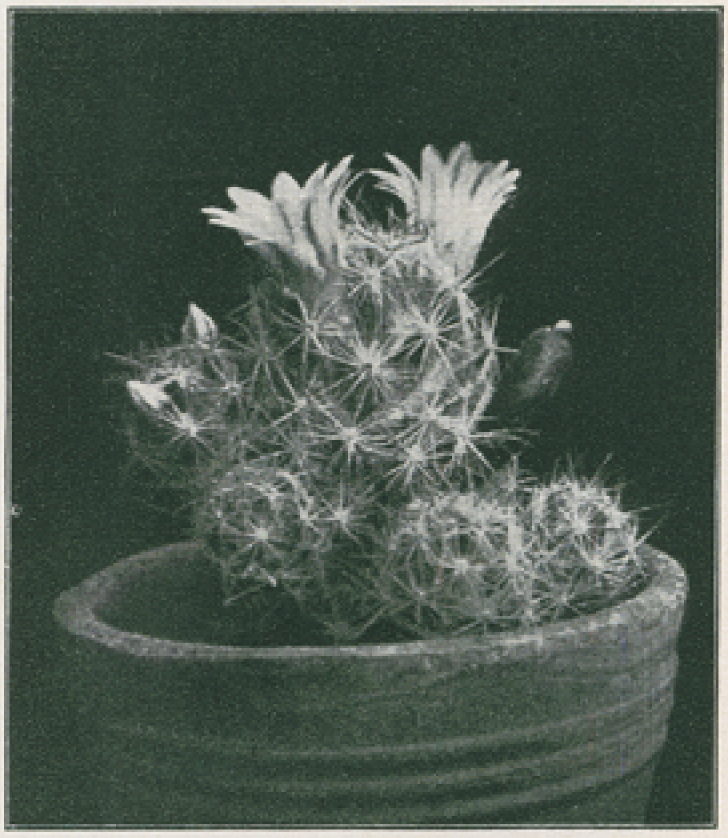

Mamillaria cephalophora (Nr. 1451)

Mamillaria Vieredkii (Nr. 1724)
(Aus „Der Kakteen-Freund"

Mamillaria ocamponis [?] (Nr. 1630)
15 Monate alter Sämling 4 cm ∅ mit 5 prächtigen rosa Blüten, welche sich 6 Tage hielten und 3 cm ∅ erreichten. Ich hoffe von dieser prächtigen Art im Frühjahr oder Sommer frischen Samen liefern zu können.
Seedling of only 15 months with beautiful pale cerise pink long lasting flowers. I hope to get fresh seeds in Spring or Summer.
Semis à l'âge de 15 mois à fleurs rose géantes. Peut-être je recevrai des graines fraîches au printems ou pendant l'été prochain.

Mamillaria prolifera [pusilla] (Nr. 1655)
Nat. Größe; nat. size
(Aus „Der Kakteen-Freund")

Crassula columnaris (Nr. 2279)

Agave Victoriae-Reginae (Nr. 2097)

1. ***Haworthia*** *cymbiformis,* 2. *H. limifolia,* 3. *H. planifolia,* 4. *H. retusa,* 5. *H. tesselata (f. parva),* 6. *H. limifolia,* 7. *H. tesselata,* 8. *H. atrivirens,* 9. *H. turgida,* 10. *H. altilinea* $^1/_2$ nat. Größe (Phot. Jacobsen, aus „Die Sukkulenten")

Kleinia neriifolia (Nr. 2470)

Rodhea coccinea (Nr. 2278)
(Crassula rubicunda, hort.)

Kalan hoe Blossfeldiana

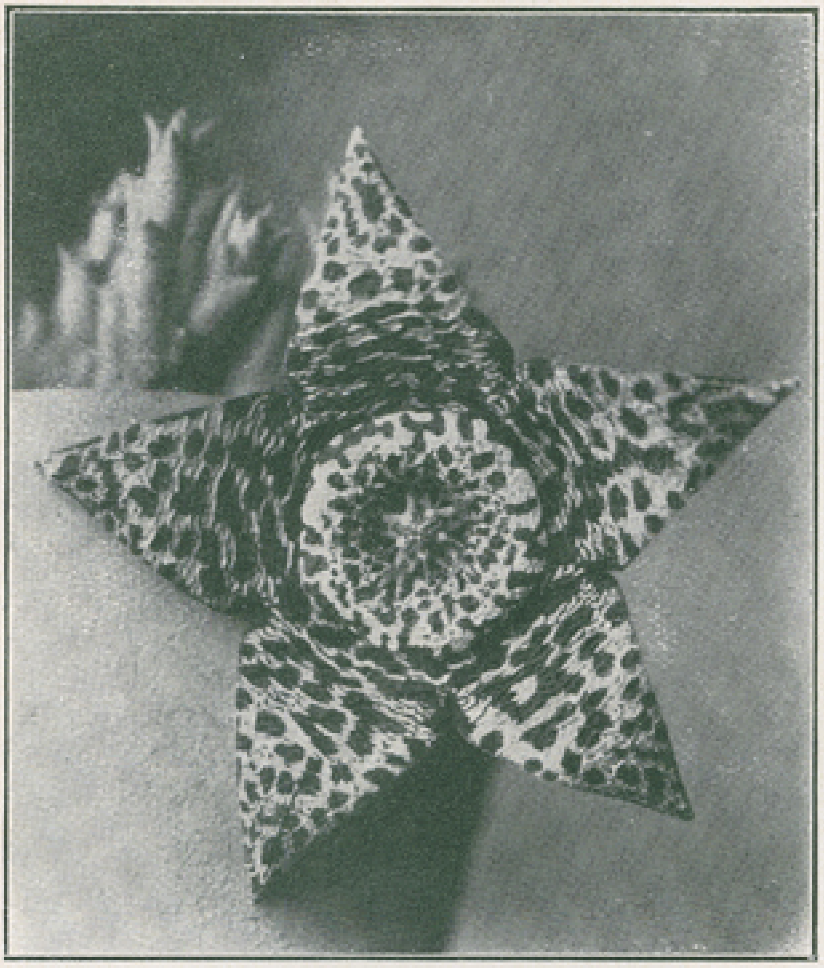

Kalanchoe globulifera var. coccinea Selecta (Nr. 2450)

Aufgenommen im März 1933. In der Mitte: Große Einzelpflanze von Januar-Aussaat. Rechts und links: Einzelpflanzen von Mai-Aussaat. Mitte vorn: Einzelpflanze von Juni-Aussaat. **Seite 37**

Photo taken in March 1933. In the centre: Large single plant from January sowing. Right and left: Single plants from May sowing. In the foreground: Small single plant from June sowing. **See page 37.**

I can confidentially recommend my customers to grow this beautiful winterflowering plant in quantity. It needs no more trial. It has been tried out in all parts of the world and innumerable delighted testimonials confirm that it is a novelty of real merit and of great commercial value.

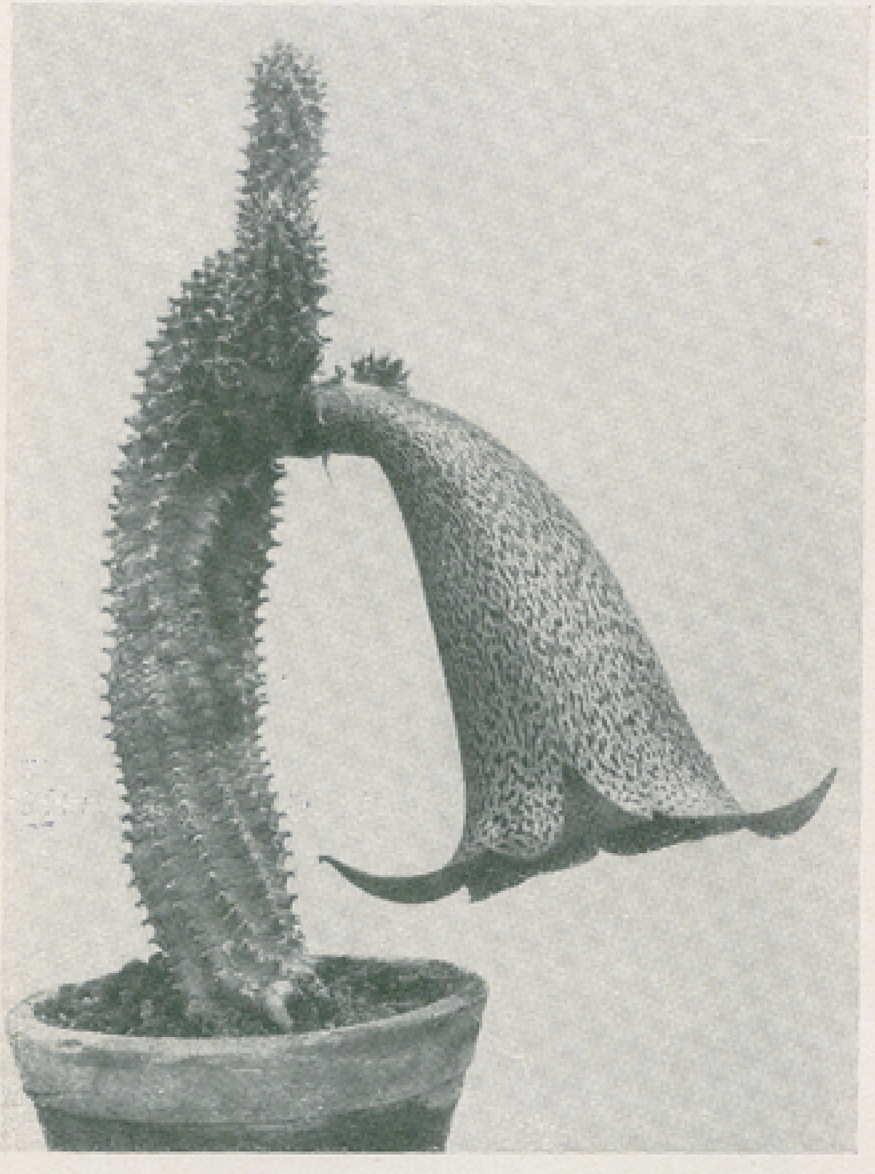

Photographié en mars 1933. Au centre: Forte plante semée au mois de janvier 1932. A gauche et à droit: Plantes semées au mois de mai. Sur le devant: Petite plante semée au mois de juin. **Voir page 37.**

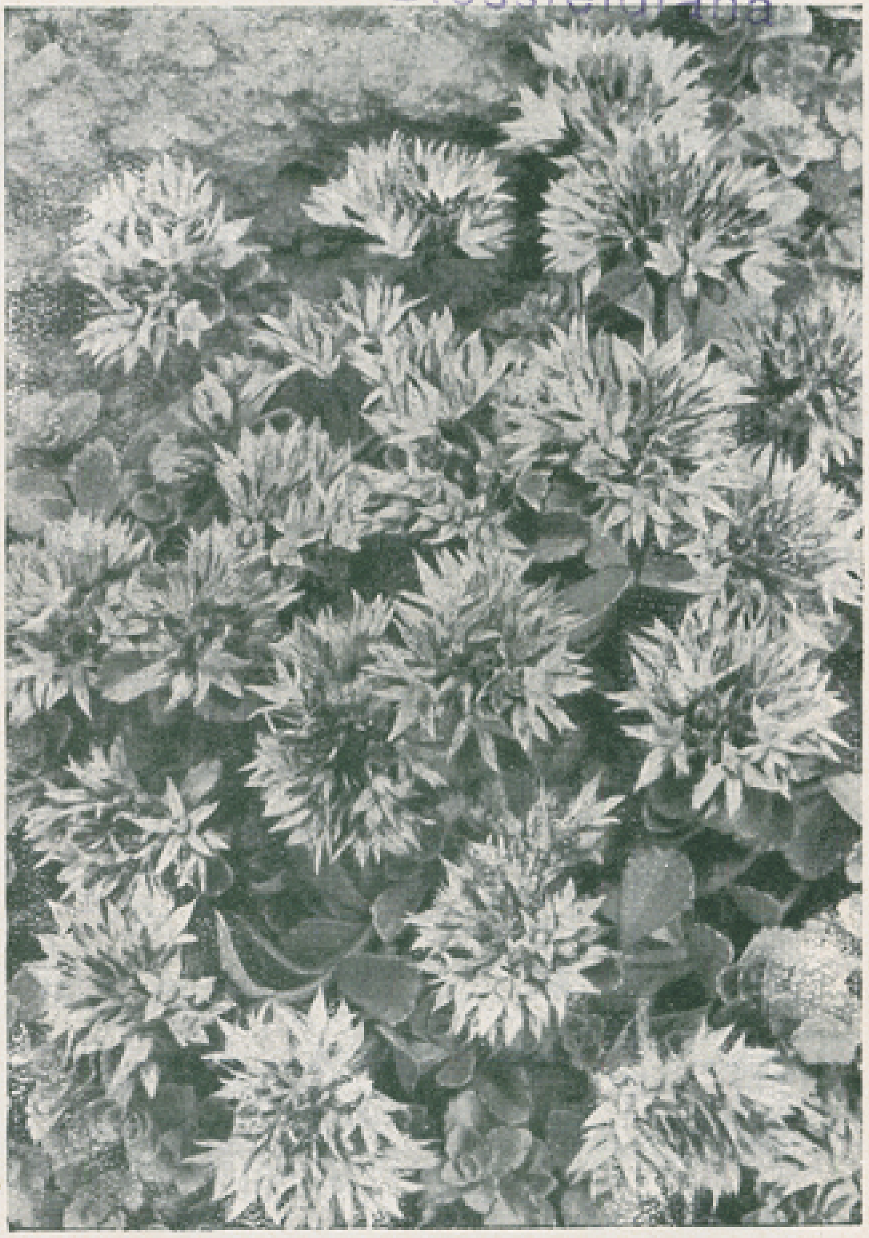

Stapelia variegata (Nr. 2690)
(Aus „Der Kakteen-Freund")

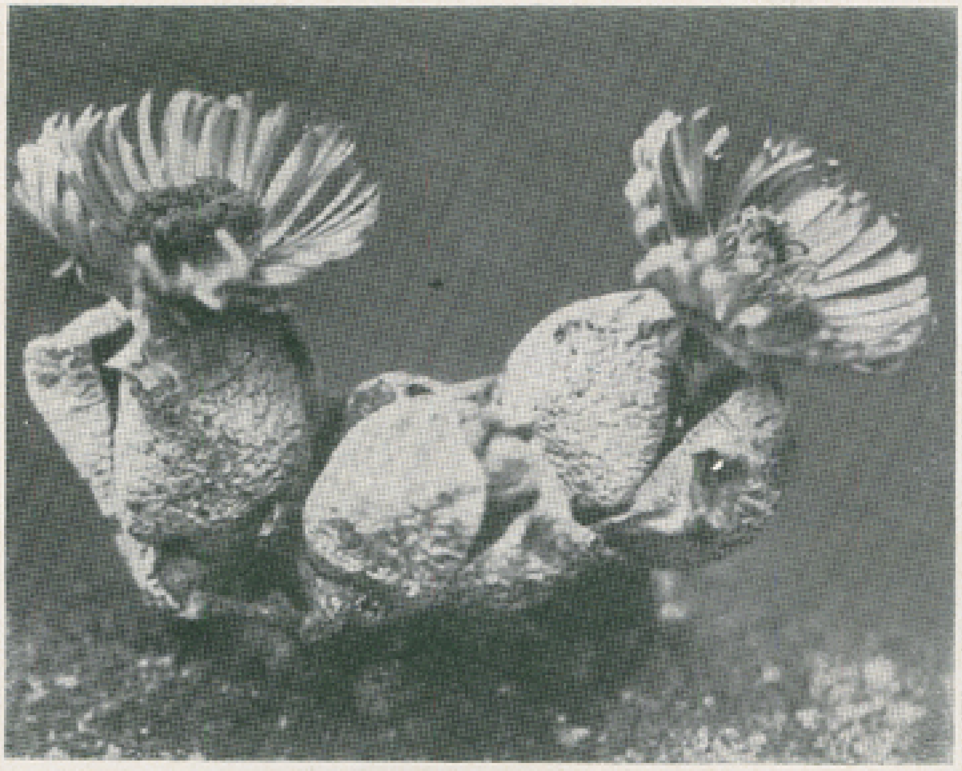

Kalandhoe glubulifera var. coccinea Selecta
Kalanchoe Blossfeldiana

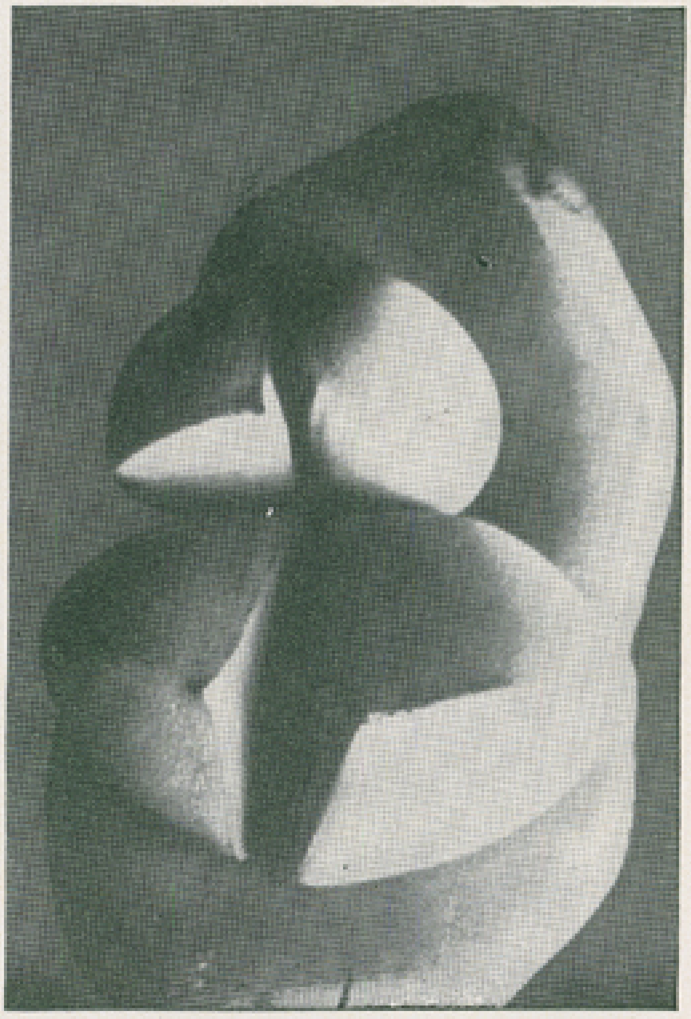

Tavaresia grandiflora (Nr. 2702)

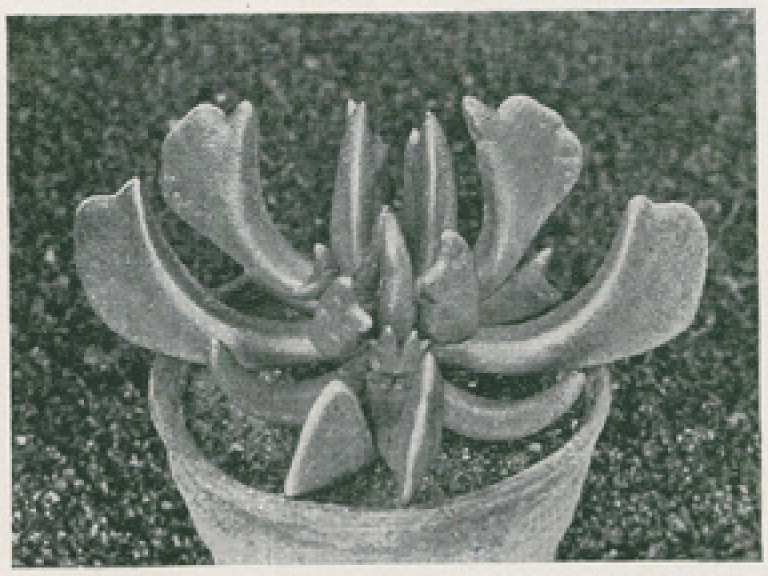

Sedum spurium coccineum
fol. atropurpureis (Nr. 2571)
Purpurteppich; Bronze Carpet;
Tapis pourpré; A foglie atropurpuree

Dinteranthus microspermus 1/1 (Nr. 3129) Phot. Dtr.
In wildem Zustande durch das Blühen geschrumpft.
Wild plant exhausted from flowering.
Une plante sauvage épuisée de la floraison.

Dinteranthus microspermus
1/1 (Nr. 3129) Phot. Dtr.

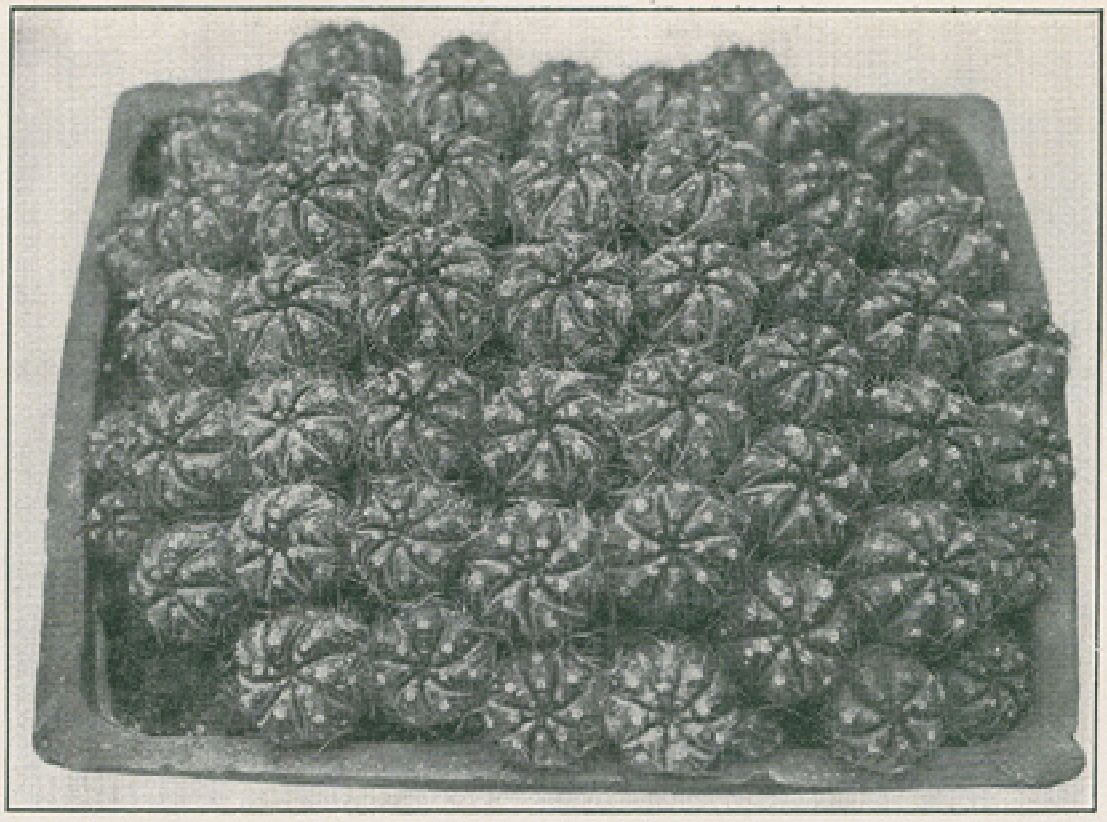

Hereroa dolabriformis (Nr. 3272)
1/2jähriger Sämling, ca. 2/3 nat. Gr.
Seedling of 6 months, abt. 2/3 nat. size
Semis de 6 mois, 2/3 naturel

Trichodiadema densum (Nr. 3590)

Dorotheanthus criniflorus (Nr. 3366)

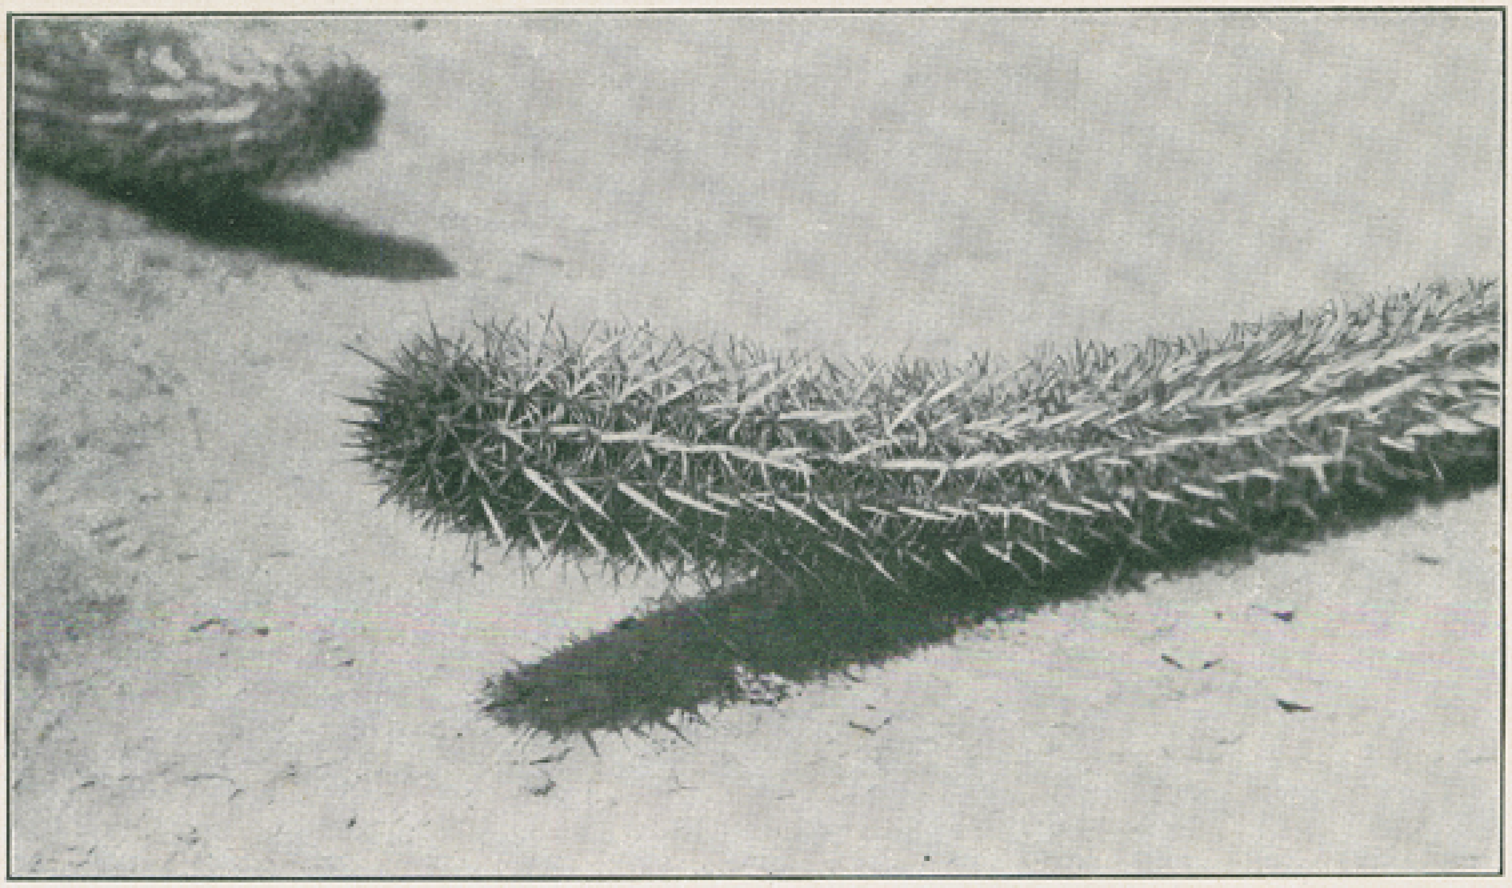

Sämlingsschale mit Echinocactus Ottonis (Nr. 931)
Seed-Pan with Echinocactus Ottonis
Terrine de semis d'Echinocactus Ottonis

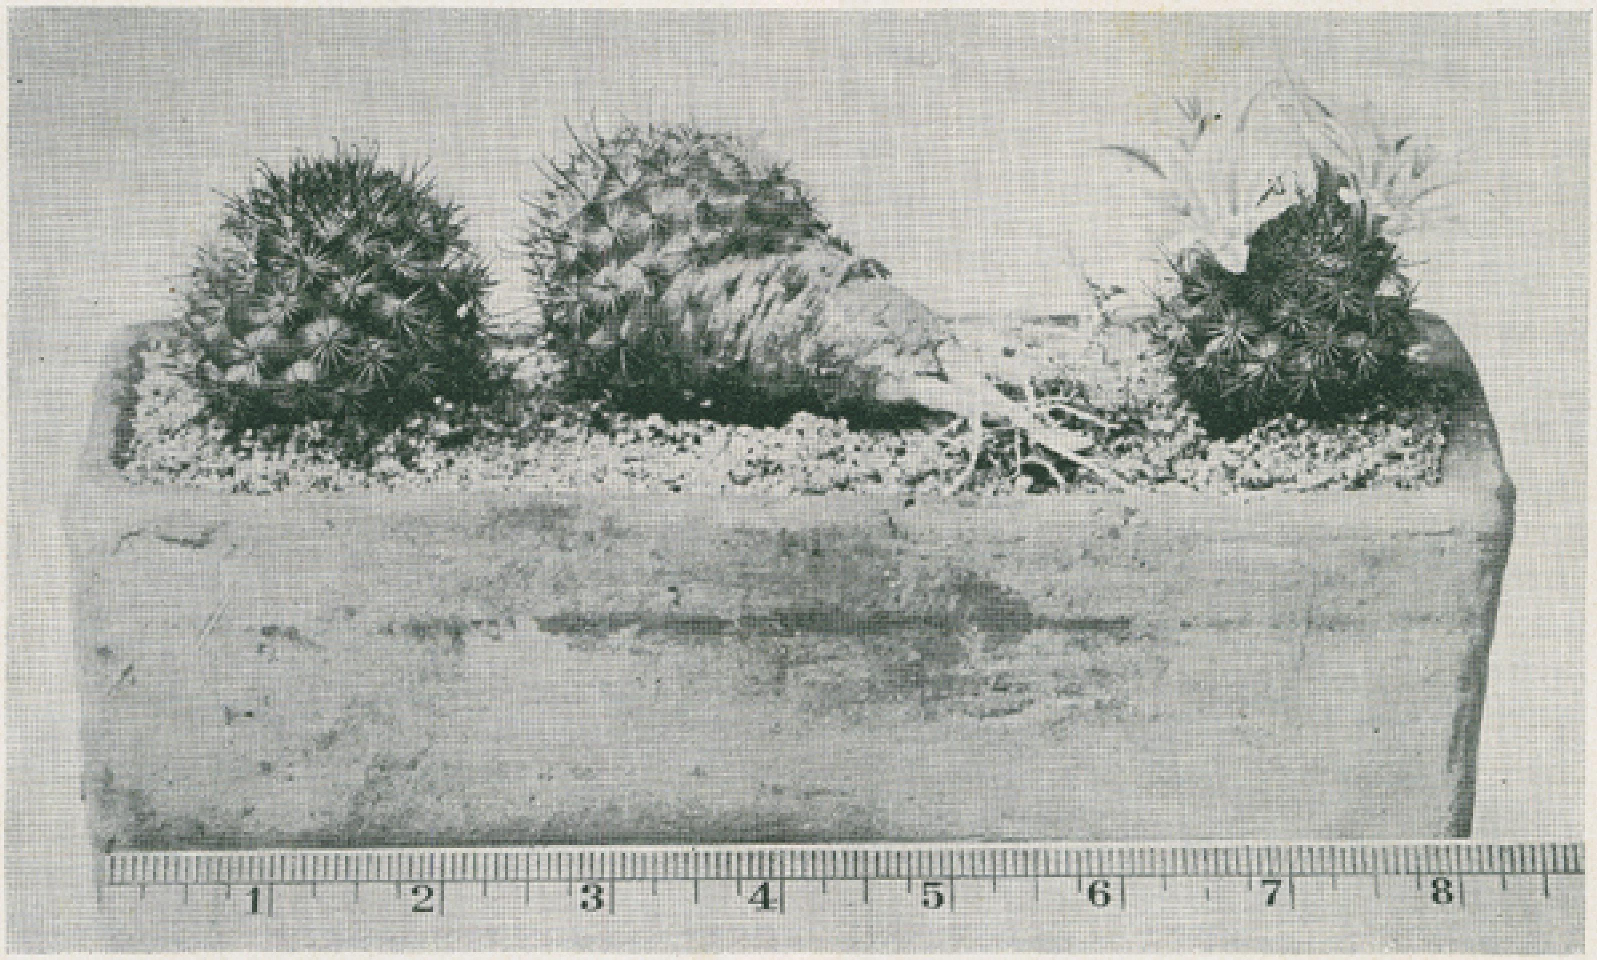

Blühende Echinopsis
Echinopsis in flower
Echinopsis fleurissant

Teil einer Schale mit Lithops Sämlingen
Part of a seed-pan with Lithops seedlings
Partie d'une terrine de semis de Lithops
